

# ZIELONY NIEDŹWIEDŹ

Good vodka is tasty.

This is why we choose only those types of vodka that are made skilfully.

There is a whole variety of aromas in a good whisk(e)y. Their intensity is balanced by their inner beauty. This is why we reach out to „eau-de-vie” produced by distilleries working hard to make malt, peat and barrel to their best to the products.

Real whisk(e)y stirs up the spirit and probably this is why in the Middle Ages pure alcohol was called „spiritus”.

Cheers!
